

## INSTRUCTIONS ON ACCESS CODE INSTALLATION

1. **Admin System** (the first system) you keyed in the Access code.

- This system can add other systems in the centre.
- This system creates the username and password for that centre (SuperUser).

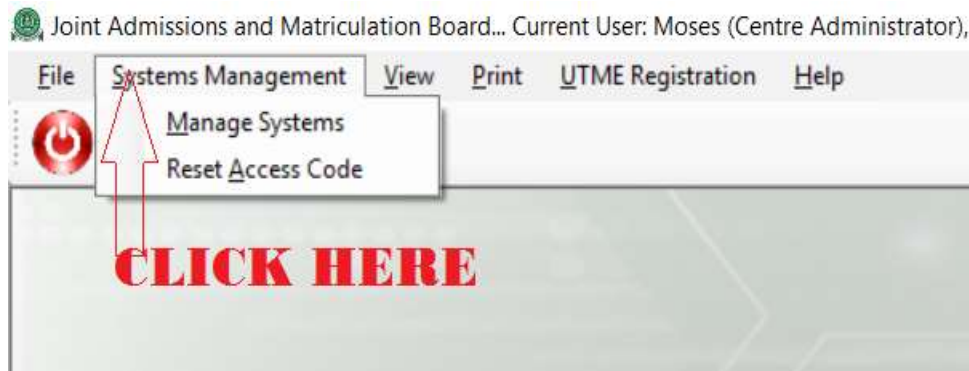

- Then create a general user which will be used on the other machines.

## 2. To add other systems.

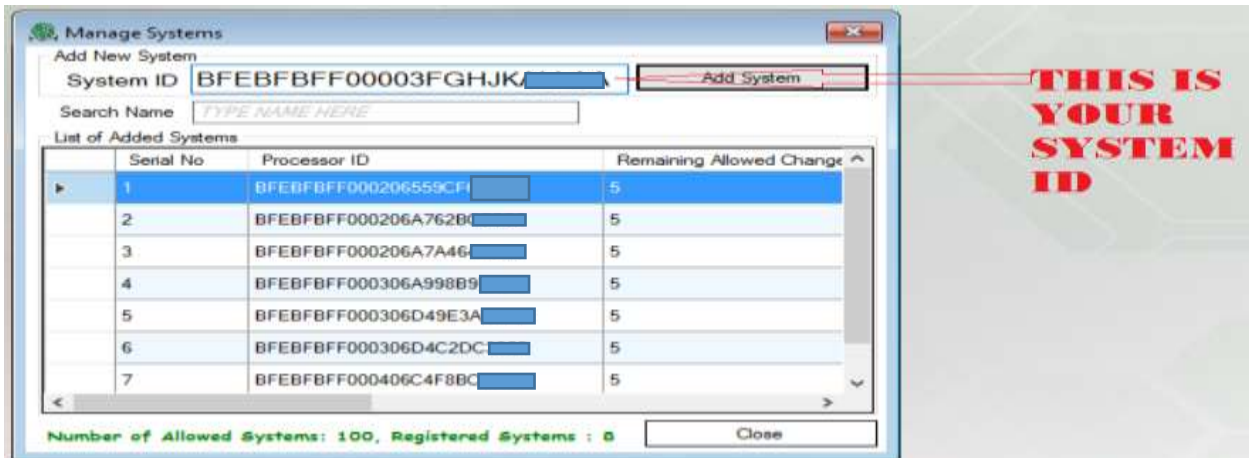

- Install the Registration application on the new machine.
- Run the JAMB Registration Application.
- It will prompt you to key in your access code
- At this point, **wait!** Do not key in the access code.
- **Note** the system ID on that system.

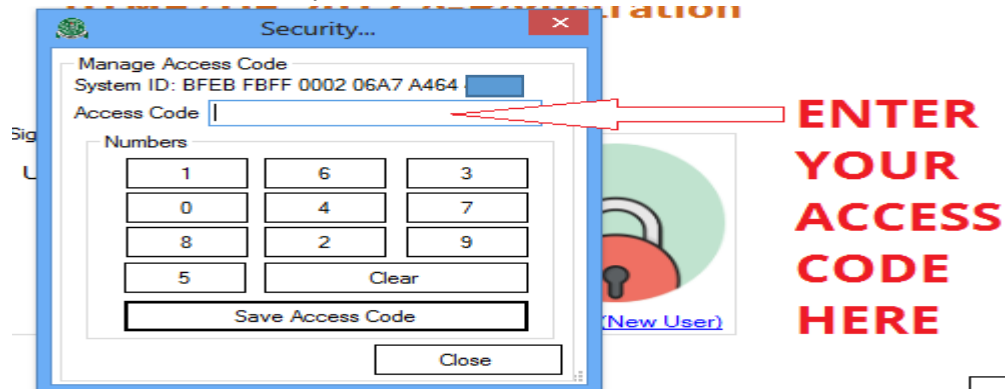

- Go back to the Admin system, launch the Application and GOTO System Management.

- Click on Manage Systems.
- Type in the system ID of the new system and SAVE.

- Go back to the new System and insert the access code

- Sign in with the general username and password (Not SuperUser)
- All should be fine now.
