ADVISORY ON 2020 CBT CENTRE ACCREDITATION AND PROVISION OF NETWORK CABLE TO CONNECT BIOMETRIC VERIFICATION POINT TO SERVER ROOM

1. The Board has decided to send various teams for accreditation of both old and new CBT centres. This exercise should have commenced on Wednesday 11th November, 2019 but had to be moved forward by two days to enable CBT centres attend to this advisory.
2. The Board hereby requires as a basis for accreditation, that each center install a network cable between the server room and the biometric verification location with the following parameters:
 - a. the network cable must be a single CAT6 cable;
 - b. the network cable must be standard and of high quality copper;
 - c. the network cable must not be more than 60m for efficiency;
 - d. the network cable must terminate into the master switch of the server room of the Center;
 - e. the network cable must be a straight cable and not crossover; and
 - f. the network cable must be trunked.
3. CBT Centres are once again reminded that Static IP addresses are to be used and NOT dynamic IP addressing. Any Center using Dynamic IP Addressing will be disqualified.

4. All CBT centres are advised to reserve addresses between 1 and 10 for JAMB servers e.g. 192.168.10.2.
5. The Star Topology is the recommended topology for all Accredited CBT Centers.
6. Each CBT centre is advised to create a table space for National Identity Management Commission (NIMC) for enrolment of candidates who may come for UTME/DE registration but do not yet have National Identity Number (NIN).
7. Each CBT centre is mandated to comply with these directives.
